

Single Crystal Aluminium Oxide (SA)

Single crystal aluminium oxide is used to grind stainless steel, high-speed steel and heat sensitive steel, etc.

Chemical Composition				
Item	Chemical composition (% , by weight)			
	Al ₂ O ₃	SiO ₂	TiO ₂	Fe ₂ O ₃
Single crystal aluminium oxide	≥99.20	≤0.07	Around 0.45	≤0.08

Note: Special requirement on chemical composition can be satisfied through discussion.

Optional Particle Sizes	
Product Category	Particle Size
SA	F12-F220, P12-P220 etc.

Note: Special specification can be customized according to customer's requirements.
